EDUCATION

University of Waterloo

Waterloo, Canada

Master of Applied Science in electrical and computer engineering

Sep. 2022 – Sep. 2024

- Thesis: Robust Reinforcement Learning for Linear Temporal Logic Specifications with Finite Duration
- Best paper award at the 37th Canadian Conference on Artificial Intelligence (CAIAC 2024)

Amirkabir University of Technology

Tehran, Iran

Bachelor of Science in computer engineering

Sep. 2017 – Mar. 2022

- Thesis: Learning the Game of Gobblet Through Reinforcement Learning

WORK EXPERIENCE

Product Engineer

Toronto, Canada

Reffie

Apr. 2026 – Current

- Full-stack development of an AI-powered SaaS platform for landlords to manage properties and tenants in one place.

Cloud Engineer

Markham, Canada

Huawei Canada

Aug. 2025 – Mar. 2026

- Designed and deployed a **Kubernetes**-based microservices system including a forecasting service, backend and UI, to monitor real-time VM demand and visualize historical and projected cost/latency.
- Built a simulation-driven optimization engine to **evaluate autoscaler configurations**, predicting and recommending settings that reduced cost and latency by up to 60%.

Machine Learning Engineer

Waterloo, Canada (remote)

Open Power

Oct. 2024 – Aug. 2025

- Developed and deployed an AI-powered dashboard using **PyTorch** for solar panel detection achieving over 80% accuracy on UK satellite imagery with **vision transformers** and custom CNNs.
- Designed and implemented a serverless, **scalable prediction engine** managing 1,000+ custom ML models on GCP **Vertex AI**, utilizing a meta-agent architecture to enable automated aggregation for accurate and consistent online decision-making across 10+ business domains.
- Implemented **end-to-end CI/CD pipelines** for plug-and-play model deployment, enabling automatic model training, inference and hyperparameter tuning, with near-zero downtime for the prediction engine.

Research Assistant

University of Waterloo

CL2 lab

Sep. 2022 – Sep. 2024

- Developed an **RL** method using MCTS and neural networks for linear temporal logic specifications.
- Gained full experience in problem-solving, testing, and publishing results in peer-reviewed conferences.

SKILLS

Programming Languages & Scripting: Python, C++, C, React, JavaScript, Java, MATLAB, SQL

Frameworks and Libraries: LangChain, LangGraph, CrewAI, PyTorch, TensorFlow, Transformers, XGBoost, TensorBoard, Numpy, Scikit-learn, Pandas, Matplotlib, Seaborn, Tableau, FastAPI, Django

Developer Tools: Git, Kubernetes, Docker, DVC, Cloud Workflows, GCP, Google Colab, Vertex AI, Hadoop

HONORS AND AWARDS

Best Paper Award at the 37th Canadian Conference on Artificial Intelligence (CAIAC 2024)

Graduate Research Studentship (GRS) Scholarship of 36,000 CAD/year: University of Waterloo

International Master's Award of Excellence (IMAE) of 2,500 CAD/term: University of Waterloo

Ranked 19th/30K: In the national university entrance exam among 30 thousand students (Iran, 2016)

Announced as an outstanding student: in Amirkabir University of Technology
